

The result of 8 years of cooperation between AVmax System Integration Ltd. and Frissdiplomás KftHVG Job Fair – which has already been successfully organized 16 times. Our company supplies Hungary's largest job search event with TVs, displays and stage equipment (projector, projection screen, sound equipment, microphones).

# HVG JOB FAIR

The service itself can be divided into 3:

## 1. Equipping exhibition stands with visual devices

Exhibitors may request displays for their stands in line with their own needs. The TVs of the requested size can be placed on the floor or mounted on a wall in the requested position.

## 2. Exhibition café equipment

A 274cm screen with a 3200 ANSI lumen projector is placed in the cafe area. This serves as the venue for the evening awards ceremony, so we also provide smaller sound systems and microphones.

## 3. Preparation of the presentation space with audiovisual devices

The presentation space is the main venue of the event. Here, the presentations are continuous from 11am to 5-6pm, providing various tips for writing a resume, job search, or even negotiating a salary. As this is a priority area, a 366cm screen is placed here year after year, with Epson's high-end projectors (~ 15,000 ANSI lumens brightness). The right sound is provided by a Nexo system, where performers are given a handheld or headset microphone. The performances are also recorded on camera, which is taken care of by our company too.

As the Job Fair breaks the record on a new peak of attendance almost every time, further expansion is inevitable in terms of equipment as well as the delivery of different solutions to suit individual needs. And AVmax's rental business is ready to implement it.

## HVG JOB FAIR
